

DIBOND®

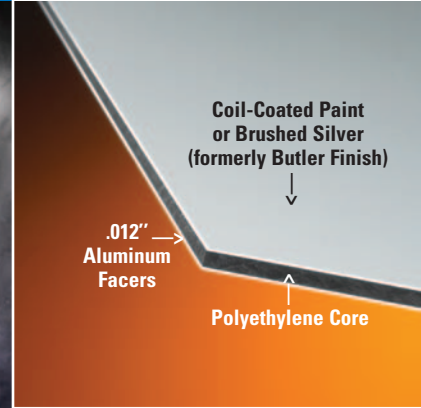

THE ULTIMATE SUBSTRATE

Dibond is an aluminum composite material (ACM) made of two pre-painted sheets of .012" aluminum with a solid polyethylene core

Why choose Dibond?

- › Flattest panel on the market
- › Superior surface protects expensive digital and screenprinted graphics
- › Provides excellent durability in outdoor applications
- › Won't bow or oil can
- › Approximately one half the weight of aluminum

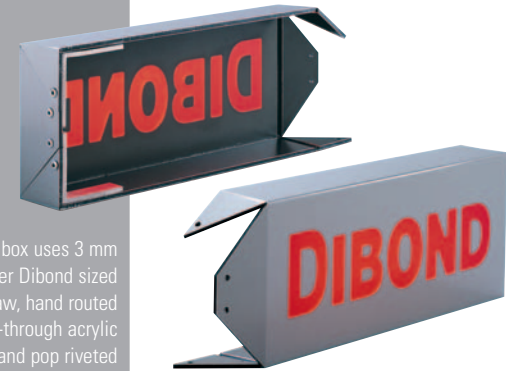

Aluminum extrusion exhibit system made with 3 mm white Dibond panels with vinyl applied.

Applications	POP Displays	Exhibits & Kiosks	Framing	Framing - Archival	Signage - Interior	Signage - Exterior	Signage - Structural
Dibond®	L	L		L	L	L1	L2

- L** Long-term application life
- L1** Applications such as workzone signage
- L2** Applications such as canopies and column covers

Fabrication	Mounting	Repositioning Vinyl	Direct Digital Printing	Direct Screenprinting	Painting	Knife Cutting	Saw Cutting	Routing	Die Cutting	Embossing	Forming Curves	Framing
Dibond®	1											

1 Cold mounting techniques only

Sign light box uses 3 mm fine silver Dibond sized on table saw, hand routed for see-through acrylic letters and pop riveted into aluminum extrusions.

Measurements and Colors	48 x 96" 1220 x 2440 mm	48 x 120" 1220 x 3050 mm	60 x 120" 1520 x 3050 mm	49.21 x 96.06" 1250 x 2440 mm
2 mm 0.08"	W/W	W/W		
3 mm 1/8"	W/W, R/Y, MB/W	B/W, DB/FS	W/W	BS/S, BG*/S
4 mm 5/32"	W/W			

W/W = White over White, B/W = Black over White, MB / W = Marine Blue over White, DB/FS = Dark Bronze over Fine Silver, R/Y = Red over Yellow, BS/S = Brushed Silver over Silver, BG/S = Brushed Gold over Silver.

Custom colors and measurements available.

*For interior use only
